

KONICA MINOLTA

The essentials of imaging

Notice of installation

magicolor 8650

Status: March 2008 Version: 1.0

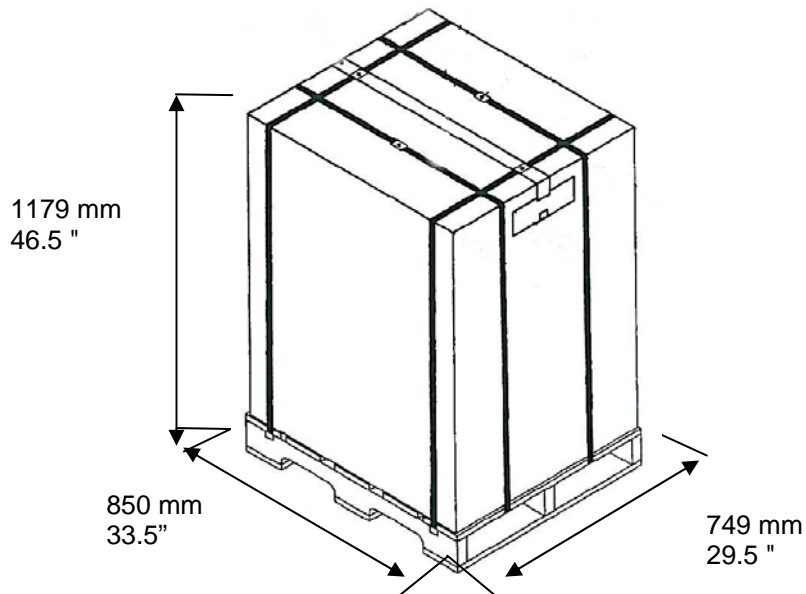

Notice for installation of the magicolor 8650.

Requirements for installation of the magicolor 8650:

Please note that the magicolor 8650 is a full size A3 laser printer, meaning that this printer is larger and heavier than an average A4 laser printer.
In case the printer has to be installed on another floor than the ground floor, please make sure an adequate (size and maximum load) elevator is available. For details on this, see information below.
In addition to this please take notice of the weight of this printer in regards to lifting by staff at time of installation. This may require 3 or 4 persons.

Boxed printer:

Weight Machine (boxed)	Approx. 117 kg (257.94 lb)
Dimensions	850 mm x 749 mm x 1179 mm (length x width x height) 33.5 " x 29.5 " x 46.5 " (length x width x height)

Before installing the mc 8650 please check the Power outlet requirements listed below.

- Power consumption is max. 1500W. This requires a power outlet with at least 8 Amp at 220V.
- We also highly recommend connecting the printer directly to the wall power outlet. Do not use extension cords.

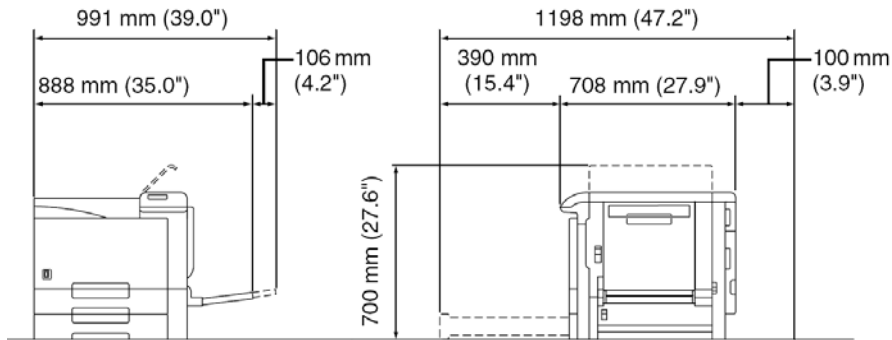

Weight of the printer:

Machine	Approx. 79 kg (174 lb) (without Print unit and toner cartridge)
Print Unit and Toner cartridges	Approx. 6.8 kg (17.2 lb)

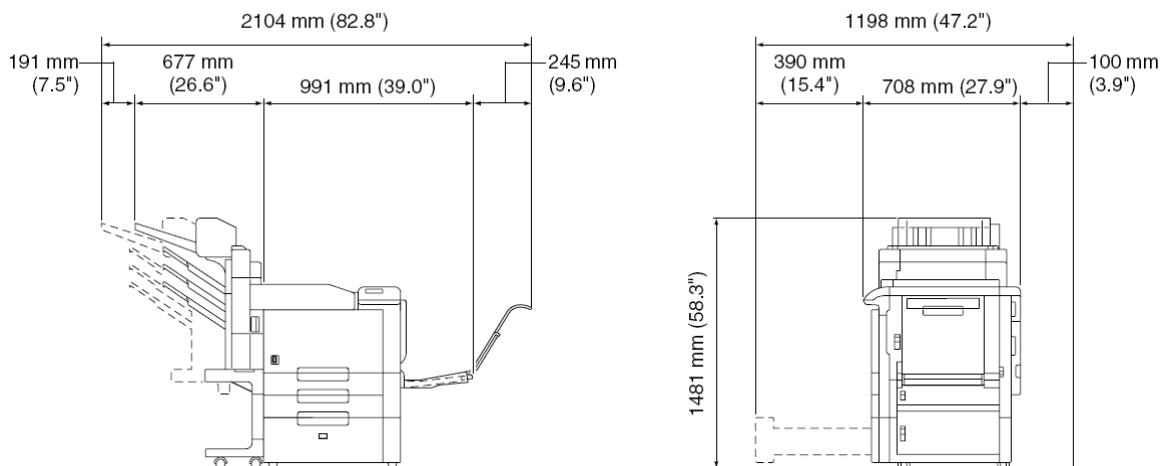

Installation space requirements:

To ensure easy operation, consumable replacement, maintenance and sufficient air conditioning for the printer, adhere to the recommended space requirements detailed below.

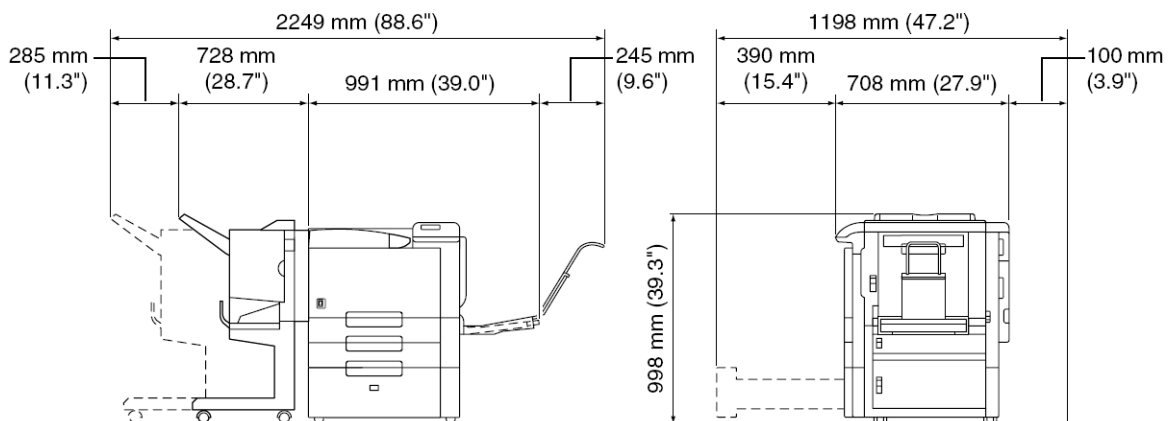

Stand Alone Machine: Weight: 79 kg (174 lb)

With installed option Finisher FS-519: Weight: 33.5 kg (73.25 lb)

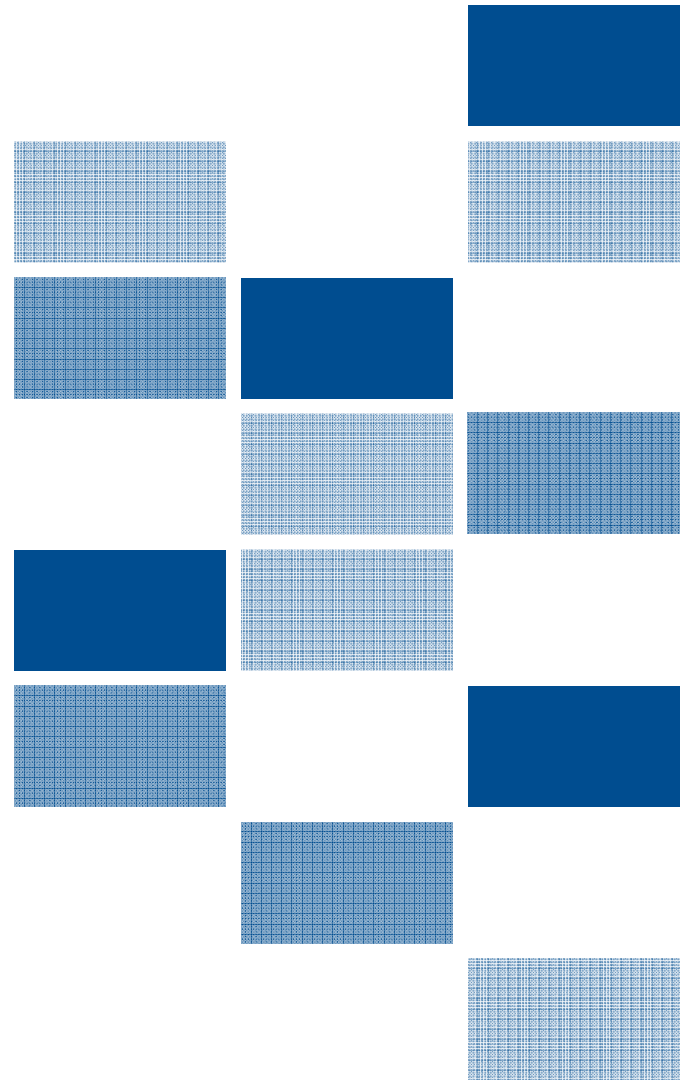

With installed option Finisher FS-609: Weight: 42.0 kg (92.5lb)
